

Project Engineer

Nekoosa Coated Products is seeking an enthusiastic candidate to fill a newly created position – a Project Engineer. The successful candidate will be organized, have the ability to multi-task, be a team player, have strong computer skills, and strive for advancement within our company. The candidate must possess the ability to communicate effectively with customers and/or internal resources. Excellent problem solving skills, creativity, and the ability to execute on ideas are essential.

This position will be responsible for overseeing our production department to identify areas of concern and design and implement process improvement projects to drive efficiency to maximize output and reduce scrap. This position will also be overseeing our maintenance department to provide leadership and engineering support to design capital and maintenance improvements projects, including equipment installations, modifications, expansions, and upgrades.

Essential Duties and Responsibilities

- Draft and design layout of equipment, materials, and workspace to maximum efficiency, using drafting programs
- Assist in planning, developing and implementation of capital and maintenance improvement projects
- Analyze existing processes, and equipment to provide recommendations for needed capacity, efficiency improvements, and safety modifications
- Support lean initiatives to reduce waste and maximize machine efficiencies
- Manage the implementation of all improvement projects to meet project deadlines and provide status updates to management.

Qualifications

- Knowledge of mechanical and electrical components
- Strong mathematical and analytical skills
- Able to multi-task and work independently to execute and meet project timelines
- Must be self motivated and able to work within a team

A bachelor's degree in paper-science, mechanical/electrical engineering, or a related field is preferred, but not required. The successful candidate will be familiar with a variety of mechanical/electrical concepts, practices, and procedures. 3 – 5 years job related experience is beneficial. Our company will consider new graduates for this position.

Nekoosa Coated Products offers the broadest range of products, not only carbonless paper, but also synthetic substrates and magnetic paper. Check out our website at www.nekoosacoated.com

To apply, send cover letter and resume to hrmanager@ncpedge.com or send by mail to 841 Market Street, Nekoosa.
