Carbonless Paper Line Expands with New Universal Grade A Premium Hybrid Sheet for Digital and Offset Printing

We are very excited to announce the launch of our new Universal carbonless paper to compliment our U20 and Digital carbonless product lines. This new carbonless product is specifically designed to meet the needs of the emerging hybrid printer, who utilizes both digital and offset print platforms. With an optimized combination of chemistries and base paper, our Universal carbonless has been engineered to meet our market leading quality standards for imaging and performance - Guaranteed.

Nekoosa is now the only manufacturer that offers three unique carbonless solutions to meet the specific forms printing needs of each printer: U20 for all offset printing, Digital for premium laser printing, and now Universal for hybrid digital and offset printing. This full carbonless product range, along with our portfolio of specialty substrates, gives an unmatched offering to achieve sustained profitable grow for our merchant partners.

Nekoosa Universal carbonless is available in all the most common sheet sizes and is backed by a new performance guarantee. Our strong environmental commitment continues with our Universal product being SFI certified, consistent with all our carbonless products.

Known for innovation in carbonless paper technology for over 50 years, Nekoosa Coated Products now offers an expanding line of specialty substrates including: ThermaTac, a new digital removable vinyl signage product; Thermanent®; a premium digital polyester; MagneCote™, the world's first magnetic paper; Synaps®, a premium offset/HP Indigo synthetic from Agfa; a full line of FSC-certified (Forest Stewardship Council) digital coated papers, and other specialty papers.
