

IDENTIFIER™
INKLESS BIOMETRIC IDENTIFICATION SYSTEM

For the most important
aspects in your life...
crisp, clean and hassle free prints.

nekoosa
COATED PRODUCTS®

Save time and leave the mess behind.

Choose from standard forms or create custom certificates

Forget messy, time-consuming ink methods; the Identifier™ Inkless Biometric Identification System from Nekoosa is clean and easy to use thanks to proprietary technology that produces permanent images without ink. A soft impression is all that is needed to eliminate the smudged prints so common with old-fashioned ink systems. There's no mess, no cleanup ... and no sacrifice in quality.

The simple, two-step process yields consistent, high-quality prints ideal for scanning. Just clean the area you would like to image; moisten it with your choice of applicator and press onto an Identifier™ form. The special coating on the form produces a crisp, permanent image immediately without the mess and hassle associated with other methods.

The FBI authorized Identifier™ as a superior biometric identification system based on an evaluation by its fingerprint instructors. No wonder more than 150 hospitals use Identifier™ every day for standard or custom birth certificates and announcements. This versatile product is also used at crime scenes and for jewelry prints, clay keepsakes, animal prints and more.

Pre-printed Certificates ▶
Standard birth certificates and "In Baby's Memory" certificates available in packs of 100. Your choice of applicator available separately.

★ Visit nekoosacoated.com for product instructions.

Custom Certificates and Forms ▶
