Inkless Biometric Identification System

Save Time and Leave the Mess Behind

Easy, Inkless System Delivers Superior Prints - Recommended by the FBI

For the highest quality biometric prints available, forget messy, time-consuming ink methods. The Identifier system from Nekoosa is clean and easy to use thanks to proprietary technology that produces crisp, permanent images without ink. Smudged, blurry imprints from old-fashioned ink systems are a thing of the past with Identifier.

A simple, two-step process yields consistently high-quality prints ideal for scanning. Just clean a baby's foot, wipe it with an Identifier applicator, and press it to an identification form. A soft impression is all that's needed and hands stay clean. Parents' prints are easy to add using the same process. Best of all, because prints develop only where they belong on the form, stray marks and prints are eliminated.

The FBI recommends footprinting newborns and has authorized Identifier as a superior biometric identification system based on an evaluation by its fingerprint instructors. No wonder more than 150 hospitals use Identifier for standard or custom birth certificates and announcements.

Identifier Kits

The Identifier system is available in convenient kits of 100 certificates in your choice of two styles: one for baby's footprints only or one for baby's footprints plus a parent's fingerprint. Each kit also includes 100 applicators.

Standard Certificates

Two pre-printed certificates are available: a standard birth certificate or a special "In Baby's Memory" certificate. Applicators and inkless pads are available separately.

Custom Certificates and Forms

Identifier offers a wide variety of options for custom, full-color, and one-color certificates and forms.
