

CONTRACT COATING AND CONVERTING

Put the Nekoosa Coated Products difference to work for you. With experienced personnel and superior equipment under maximum utilization, Nekoosa Coated Products can offer a higher level of service and a better quality of finished products than many in-house coating and converting operations.

Special Services Help You Build a Competitive Advantage

- ~ Specialized in digital grade products and sizes
- ~ Contract coating
- ~ Contract rewinding, slitting, and sheeting of paper, film, non-woven and specialty materials
- ~ Centrally located distribution center
- ~ Research and development for specialty materials

The essence of our business is providing quality you can count on and quick turnaround to help you meet even the tightest delivery schedules.

High Quality Finished Goods, Every Time

We start with a team of people who excel at customer service, supported by some of the most technologically advanced equipment in the material converting industry. Each one of our machines is custom-engineered, giving us the ability to convert even the most sensitive paper, film, non-woven and specialty materials. You receive finished products converted to your exact specifications. The right size. Delivered on time. Every time.

Distribution Services – We Can Store it, Coat it, Slit it, Sheet it, and Ship it...

Nekoosa Coated Products can help you reach the highest level of customer satisfaction by delivering quality products to your customers faster than ever before. Keep your inventory of master rolls at our facilities in a clean, controlled environment. We can process your order on a predetermined schedule or as-needed basis. You'll not only reduce lead time on orders, but you'll save money by reducing inventory levels and freeing up costly warehousing space. Customized labeling and packaging capabilities allow us to ship the finished goods to your customer with your identity on the product.

Talented People Make it All Happen

Technology is an important tool, but it takes talented people to make the whole process work. Nekoosa Coated Products has built a dedicated team that will deliver consistently, conscientiously, and professionally.

It all starts with a committed group of sales and customer service representatives who work closely with you to understand your unique needs and set up trials and material samples. In the process, we may bring in one of our on-staff manufacturing specialists to provide technical insight. We'll answer questions, problem solve, analyze needs, and recommend options for tough applications. Together, we'll help you choose the right solution.

Precision machinery, combined with knowledgeable staff, produces high quality finished products. Our experienced machine operators have helped design and fine-tune the equipment they operate. As a result, our scrap and waste rates are much lower than many in-house operations.

Finally, our engineering team is always working to improve our capabilities – designing and refining our equipment to anticipate and support your coating and converting needs. Our goal is to keep our equipment standardized yet versatile, reinvesting in technology to increase uptime and passing the benefits of efficiency along to you.

Increase Your Business Potential by Teaming with Nekoosa Coated Products

Let Nekoosa Coated Products be your partner in innovation. Each year we are committed to investing several million dollars to improve and maintain our converting capabilities, saving our clients from making costly capital investments. Our research and development team is at the forefront of the paper, film, non-woven and specialty industries, searching for new applications and solutions to tough technical problems.

Our team of manufacturing professionals is only a phone call away. We have the know-how to solve some of your toughest challenges and increase your business potential. Experience the Nekoosa Coated Products difference. Test the value of coating, slitting, sheeting, distribution and material solutions that are easier, faster, better.

Contact us today at 1-800-826-4886, option 6, to set up a material trial or consult us about your application needs.
